

Goldtouch for Education

ERGONOMICS ON CAMPUS

For over 10 years, people suffering from pain associated with Carpal Tunnel, Tendonitis, and other Repetitive Stress Injuries have enjoyed the comfort and adjustability of the most recommended ergonomic keyboard in the world, the Goldtouch Adjustable Ergonomic Keyboard. And now, you too can provide the Goldtouch solutions to your faculty and students, cost effectively.

In the past, much of the focus for ergonomics and ergonomic peripherals has been to address people that have already been injured or that are RSI symptomatic.

Much has changed since then; the use of computers and other electronic components are an integral part of people's everyday lives and much more prevalent today than ever with gaming, texting, emailing, blogging, and other general computer use for work or social activity. The result has been a vast increase in RSI (Repetitive Strain Injury), even starting in the teenage and college years.

Employers are finding recent college graduates entering the workforce are RSI symptomatic.

RSI is an extremely costly prospect for individuals, corporations, schools, and our society as a whole given that over 90% of the US workforce currently uses computers for some aspect of their jobs. When considering all the potential ill-effects of improper computer usage, it is imperative that steps be taken to prevent these injuries from occurring, or to treat them once they have occurred.

The key to addressing these injuries is to educate students at an early age and prevent these injuries before they occur and cause permanent injury. As a call to action, Goldtouch is happy to announce our Educational Discount Program.

Goldtouch offers a number of ergonomic products for both PC and MAC users.

- Adjustable Keyboards and Numeric Pads
- Ergonomic Mouse and Mousing Platform
- Computer Notebook Stands
- Wrist Gels
- Computer Bags, Backpack and Travel Cases

Because a Goldtouch keyboard is designed to fit the range of body types, not just an average, the standard Goldtouch Adjustable Keyboard is the only keyboard designed to properly straighten the wrists and arms while aligning with the shoulders to achieve a neutral typing posture.

No other keyboard allows for the range of adjustability as a Goldtouch Adjustable keyboard.

At only 1 pound, this ultra-light, ultra-portable keyboard provides ergonomics on the go. This keyboard is perfect on the desktop for those desiring a more compact keyboard.

Supports PC and MAC.

Goldtouch Go! portable, adjustable keyboard

Adjustable notebook stands are available in multiple colors. Take advantage of limited desk space while positioning the screen at the proper height. These durable, aluminum notebook stands collapse and store in their own neoprene case for portability.

Portable, adjustable notebook stands

Mobile Student Kit

Laptop cases and backpacks by CODi provide light, durable, and comfortable accommodations for notebooks and accessories. The student organization system provides mesh and zippered accessory pockets for all supplies and educational text books.

Lightweight and durable notebook bags

The award-winning Goldtouch keyboard adjusts from 0 - 30° vertical tilt and horizontal wrist splay, allowing students to create a custom, comfortable workspace which is essential when spending long hours at a computer.
