

||| DPI

The Goldtouch Semi-Vertical Mouse features 3 DPI modes for Wireless models and 4 DPI modes for Wired models. Press the DPI button and move the mouse to select your preferred mode.

DPI Logo Light Colors: Wired Version Only

1000 DPI-Red 1500 DPI-Blue
2000 DPI-Green 2500 DPI-Purple

Wireless Version: DPI 800, 1200, 1600— No light change for DPI status to save battery power

FAQs

Q: Mouse not detected

A: Make sure the wireless receiver is plugged into the correct port and reboot your computer.

Q: Cursor moves too slow/fast

A: Select a different DPI mode

Q: Cursor moves by itself

A: A reflective surface is usually the cause. Place the mouse on a non-reflective surface.

||| Grip Options

The Goldtouch Semi-Vertical Mouse comes with one interchangeable grip flange with magnetic connection points. This flange provides more mass in order to bear the hand's weight and reduce the pressure on the wrist. Therefore, the user can move their whole arm instead of just their wrist to control the mouse.

1. **Ergo Grip Flange:** The elbow is anchored while the palm rests on the soft gel pad to reduce wrist movement and deliver maximum comfort while doing office work, browsing, and other every day tasks.

A second grip option to achieve precision mousing requires no attachment flange.

2. **Precision Mousing (no attachment flange):** The wrist and the finger are both anchored to deliver maximum precision for very demanding tasks such as gaming and graphics.

The Semi-Vertical features a thumb nook in order to relieve tension and rest comfortably throughout your day

||| Connecting Your Mouse

1. Insert the batteries into the mouse. Turn the mouse over, find the battery cover, and slide it off.
2. Remove the Wireless Receiver from the bottom of the mouse and connect the receiver to the computer. Plug your receiver into an available USB port.
3. Connect the mouse to the receiver by turning on the mouse. The Receiver is "plug and play" and does not require any additional software to work with your computer.
4. Test your new mouse. When the cursor moves when you move the mouse, you have connected the mouse properly.
5. Adjust your mouse settings. You can use the DPI selector on the mouse to adjust speed and precision. Use Windows Mouse settings to control Button Location, Cursor size and other supported Windows or Apple native functions.

**To wake the mouse from sleep, click either the Right or Left Button, or the Previous or Next Button.

||| Bottom View

Grip flange option connects to the bottom right edge of the Semi-Vertical Mouse via 3 magnetized prongs

**Wired Version Only: All six buttons are programmable. Any button shown above can be programmed to a special function after installing the software available below. The software is unnecessary unless the user wants to customize the button functions. Without the software, the buttons work as shown above. www.goldtouch.com/support/software/SVButtonProg.ZIP

Compatibility	Windows 10, 8, 7, Vista, 2000, XP, Mac, Linux
Grip Options	1 Grip Option
Power	2 AAA batteries = 300 hours or 3-6 months use
Warranty	1 Year

||| Greater Comfort through Design

The Goldtouch Semi-Vertical Mouse is designed with a 66° slope for the user who wants a mouse that is midway between a traditional ergonomic mouse and a vertical mouse. Unlike vertical mice, you'll have the power of gravity on your side when it comes to clicking, so you won't have to use as much movement between the thumb and fingers (which in turn can require more pinching of your muscles and nerves).

- Design elements of the top of the mouse are tailored to support the hand, wrist, and forearm in a natural position, minimizing pronation and contributing to superior mousing comfort.
- Design elements in the thumb area of the mouse are tailored to greatly reduce tension to the thumb joints.
- Oversized buttons provide maximum surface area to evenly distribute the work-force required for clicking.
- One interchangeable grip flange option features the ergo grip. A second mousing option for precision tasks requires no attachment grip flange.
- Removable counter weights available in the bottom of the mouse. A heavier counterweight offers more feedback, while a lighter counterweight can reduce drag.
- Adjustable DPI settings for dialing in precise response.

||| Warranty Information

The Goldtouch Comfort Mouse is protected against defects by a two year manufacturer warranty.

The Warranty is applicable to the original purchaser only and is non-transferable. Goldtouch warrants that, at the time of purchase, the product will be in working order and will be free from defects in materials and workmanship. This Warranty does not apply to normal wear and tear, neglect, accidental damage, or modifications made by any unauthorized Goldtouch Service Representative. In the event that, during the two year warranty period, the product is determined to be defective by an authorized Goldtouch Service Representative, the product should be returned for repair or replacement to the original place of purchase.

||| The Design

The Semi-Vertical Mouse is best suited for people who generally like the feel of their traditional horizontal mouse but would like a little more slope support and guidance that's closer to the level of a vertical mouse. This position is ideal for helping to prevent RSIs and is therefore excellent for people who spend long periods of time at their computers.

FCC Declaration of Conformity

The Goldtouch Comfort Mouse has been tested to comply with the requirements for a class B digital device, pursuant to part 15 of the FCC Regulations. These requirements are designed to provide reasonable protection from harmful interference in a residential or office installation. Modification or alteration to this device may void the users authority to operate this equipment.

Canada, Industry Canada (IC) Notices

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Canada, avis d'Industry Canada (IC)

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
