

||| NEWTRAL 3 MEDIUM MOUSE WIRELESS

The Newtral 3 Wireless Mouse features enhanced quality ergonomics. This mouse reduces wrist and forearm pronation through the concave depression on the thumb side of the mouse combined with the 33 degree slope of the horizontal from the pointer finger to the fifth finger position.

The slanted semi-cylindrical shape design allows gravitational force on the hand to be employed to provide the majority of the control required to precisely move the mouse. The Newtral 3 Mouse has 2 grip options: the Precision Grip and the Ergo-Grip (attachment angle). The Ergo-Grip design with detachable palm support keeps the underside of the pinky finger and palm on the surface of the desk to reduce friction.

The Newtral 3 Mouse features an updated shape and enhanced angle attachment technology.

||| FEATURES AND BENEFITS

- **Models:** Available in Wireless (Right & Left-Handed) and Wired versions (Right-Handed only).
- **Optical DPI Resolution:** Features 1000, 1200, 1600 DPI.
- **Programmable Buttons:** Features 6 programmable buttons that are customizable with driver software installation.
- **Compatibility:** The mouse is compatible with Windows 2000, XP, Vista, Windows 7, Windows 8, Windows 10, Mac OS 9, Mac OS X (10.2.8 or later), and Linux.
- **Dimensions:** Width -- 3.1" (7.8 cm) without palm support / 4.1" (10.4 cm) with palm support; Length -- 4.5" (11.4 cm) without palm support / 6.6" (16.8 cm) with palm support; Height -- 2.1" (5.3 cm); Weight -- 3.88 oz (110g) without palm support / 5.29 oz (150g) with palm support.
- **Installation:** Plug-and-play for default function. Driver is needed to program function of buttons, and is compatible with Windows systems only.

The soft gel applied to the Ergo-Grip angle support increases the size to bear your hand weight and reduces the pressure of your wrist.
